No. 774, s. 2008, NEDA Board Resolution No. 5, s. 2017, the DOH active transport playbook, and all other applicable laws, rules, and regulations, and executive issuances, the DPWH, in coordination with the DOTr and cities where public transport supply is severely insufficient, shall aim to establish proper public transport stops for the benefit of commuters, and ensure that all projects and activities pertaining to the construction, preventive maintenance, rehabilitation, reconstruction, upgrading, off-carriageway improvement, widening, or paving of primary, secondary, tertiary, bypass, and diversion roads, and the construction, widening or replacement of bridges, shall be so designed and implemented as to allocate, insofar as practicable, at least fifty percent (50%) of the road space for public transport, pedestrians, and bicycles/light mobility devices rather than the throughput of private vehicles.

All pedestrian crossings and/or footpaths and sidewalks to be constructed in accordance with this provision shall, by default, be at grade for the inclusion of persons with disability, senior citizens, pregnant women, children with strollers, tourists with luggage, and parents with children, consistent with public health and safety regulations.

For commuter safety and comfort, wherever feasible, all pedestrian and cycling infrastructure to be constructed in accordance with this provision shall be protected or grade-separated and include shaded walkways including urban shade trees, consistent with environmental laws and public health and safety regulations.

The DPWH shall, in coordination with DOTr, issue or update policies on road use classification, road space allocation, and road design, in accordance with the National Transport Policy or NEDA Board Resolution No. 5.

The DPWH shall regularly publish the list of road transformation and active transportation infrastructure projects and pertinent details thereof on its website and shall furnish copies to the DOTr.

9. Restriction on Delegation of Project Implementation. To ensure the efficient implementation of infrastructure projects, the DPWH may delegate in the following instances: (i) the AFP Corps of Engineers in high transportation security risk areas; (ii) inter-department or inter-agency projects; and (iii) LGUs with the capability to implement projects either by administration or contract as determined by DPWH, subject to the overall technical supervision of the DPWH.

   In addition, for the National Sewerage and Septage Management Program, the DPWH shall: (i) provide the technical requirements; (ii) ensure that the contractors to be engaged by the LGUs are technically capable; and (iii) regularly monitor the Program.

10. Disposition of the Motor Vehicle User's Charge Collections. Of the amounts appropriated herein, Fifteen Billion Two Hundred Three Thousand Pesos (P15,000,203,000) constituting the amount collected by virtue of R.A. No. 8794, as amended by R.A. No. 11239, shall be remitted to the National Treasury as SAGF, and shall be earmarked solely for the construction, upgrading, repair, and rehabilitation of roads, bridges, and road drainage, specifically included under the Asset Preservation Program: Provided, That the DPWH shall disaggregate the Asset Preservation Program and submit to Congress the list of the regular and Motor Vehicle User's Charge-Funded Asset Preservation projects within fifteen (15) days from the effectivity of this Act. The DPWH shall likewise post the list on its website.

11. National Building Code Development Fund. In addition to the amounts appropriated herein, the amount chargeable against the SAGF reflected in the BESF Table B.15 under the FY 2027 Proposed Expenditures shall be used to cover necessary operating expenses of the National Building Code Development Office, sourced from the five percent (5%) share of the DPWH from the building permit fees and other charges nationwide accruing to the DPWH, pursuant to P.D. No. 1096.

    Release of funds shall be subject to the submission of a budget request and other relevant budgetary requirements, and in accordance with judicious fiscal programming by the National Government, as well as applicable laws, rules, and regulations.

12. Right-of-Way Acquisitions and Payments of Contractual Obligations. The amount appropriated herein shall be used exclusively for right-of-way acquisition expenses in accordance with R.A. No. 10752 and for payment of other contractual obligations of the DPWH, relative to the implementation of infrastructure projects. The DPWH is charged with the responsibility to ensure that all right-of-way issues are resolved before the initiation of any infrastructure project.

13. Flood Control Projects. In line with the principles of the Integrated Water Resources Management as outlined in P.D. No. 1067, the DPWH may integrate water management strategies in all its flood control projects. In addition to flood control, these infrastructure projects may include water impoundment that can be utilized for various purposes such as irrigation, potable water supply, aquaculture, hydropower generation, and other beneficial uses.

14. Unified River Basin and Flood Management Database. The DPWH, in coordination with the DENR, shall jointly develop and maintain a unified river basin and flood management database to support integrated and science-based planning for watershed rehabilitation. Such coordination shall ensure that flood control projects complement environmental protection and climate resilience goals.

15. Flood Control Project Monitoring and Geospatial Validation. The DPWH, in collaboration with DENR and Philippine Space Agency (PhilSA), shall implement the flood control project monitoring and evaluation program, which shall be used for the satellite-based and geospatial validation of its flood control projects, including the classification, documentation, and publication of findings through an online dashboard shared with the DBM, DEPDev, and the COA.

    For this purpose, the DPWH shall coordinate with the PhilSA for the sharing of technical expertise, satellite imagery, analytical tools, and data infrastructure to support timely monitoring and validation of projects. The collaboration shall include: (a) mutual access to remote-sensing and other geospatial data for project validation and tracking, with PhilSA providing space-enabled products; (b) joint development or subscription to AI-assisted flood-mapping systems; and (c) technical training for DPWH personnel in geospatial analytics.

16. Project Related Expenses. For infrastructure projects costing more than One Million Pesos (P1,000,000), the DPWH is authorized to deduct, but not to exceed the following percentages of the project cost, to be used for: (i) EAO expenses and (ii) MOOE:

    (a) three and one half percent (3.5%) for releases to the Central Office;

    (b) two and one half percent (2.5%) for releases to the Regional Offices (ROs);

(c) two percent (2%) for releases to the District Engineering Offices (DEOs);

(d) one percent (1%) for infrastructure projects under the Basic Infrastructure Program undertaken by the Central Office, ROs, and DEOs: Provided, That the one percent (1%) EAO shall be given only to the implementing unit, regardless where the fund was released; or

(e) one half percent (0.5%) for infrastructure projects of other agencies undertaken by the Central Office, ROs, or DEOs, unless otherwise provided in the special provision of the agency concerned.

For EAO expenses, the same shall be limited to: (i) administrative overhead including the hiring of individuals engaged through job orders or contracts of service or such other engagement of personnel without any employer-employee relationship; (ii) pre-construction activities after detailed engineering; (iii) construction project management; (iv) testing and quality control; (v) acquisition, rehabilitation, and repair of related equipment and parts; and (vi) contingencies in relation to pre-construction activities. The EAO expenses shall be treated or booked-up as capitalized expenditures and form part of the project cost.

Asset Preservation Program	**68,418,283,000**
The program aims to improve the quality of national roads to international standards and ensure resiliency to natural disasters. This program encompasses the preservation of the existing paved national roads through the following sub-programs: Preventive Maintenance; Rehabilitation/ Reconstruction/Upgrading of damaged paved national roads; Rehabilitation/Reconstruction of National Roads with slips, slope collapse, and landslide; construction, upgrading/rehabilitation of drainage along national roads.	
Preventive Maintenance	**30,741,918,000**
Preventive maintenance is a sub-program under the Asset Preservation Program that aims to preserve and prolong the lifespan of national roads. This program is typically carried out on roads that are in fair to poor condition, with the primary objective of preventing and delaying further deterioration to a state where extensive rehabilitation is necessary. Preventive maintenance aims to prevent and delay the deterioration of national roads to a bad condition where ultimately rehabilitation is required, which typically involves Asphalt Overlay, Asphalt Overlay with Correction, and Concrete Reblocking.Asphalt Overlay is done on roads in fair condition. It involves the application of an additional layer of asphalt, that covers imperfections in existing asphalt or concrete. It is commonly applied to pavement that hasminor damage like light cracking, mild deterioration, or slightly sunken areas. The process of overlaying asphalt commonly includes a leveling out of the old asphalt pavement, ensuring a smooth, even surface on which to add additional layers.Asphalt Overlay with Correction is done on roads in poor condition. It involves the repair of short intermittent damaged sections before applying asphalt overlay. For concrete roads, the most common type of corrective maintenance is a combination of concrete pavement restoration (CPR) in terms of the replacement of intermittent shattered slabs and asphalt overlay.Concrete reblocking is done on national roads in poor condition which involves selective reblocking or replacement of intermittent shattered slabs in bad condition. process aims to improve the pavement's load-bearing capacity, reduce the risk of potholes, and enhance the pavement's durability and longevity.

Rehabilitation/ Reconstruction/ Upgrading of Damaged Paved Roads	**25,018,092,000**
The Rehabilitation, Reconstruction, and Upgrading of Damaged Paved National Roads is the sub-program aimed at restoring the national roads to an optimal condition. This sub-program under Asset Preservation Program targets national roads that are in poor condition and are no longer cost-effective to maintain.Upgrading from asphalt to concrete is also a part of this sub-program. This involves replacing the asphalt surface with a concrete one, which provides enhanced durability, resistance to heavy loads, and reduced maintenance costs.

Network Development Program	**92,179,924,000**
The Network Development Program focuses specifically on the expansion and improvement of the national road network.It aims to expand the capacity of the national road network by constructing new roads that meet the functional classification criteria and improving the quality of existing national roads through various activities. Eligibility for later classification as a national road is determined by a feasibility study and the functional classification criteria set by DPWH. This is also achieved through a range of activities such as road widening, the construction of bypasses and diversion roads, the construction of missing links/new roads, the construction of flyovers, interchanges, underpasses, long-span bridges, off-carriageway improvement, and the paving of unpaved roads.The program includes several sub-programs aimed at achieving its objectives. These sub-programs include: Road Widening; Construction of By-Passes and Diversion Roads; Construction of Missing Links/ New Roads; Construction of Flyovers/ Interchanges/ Underpasses/ Long Span Bridges; Off-Carriageway Improvement; Paving of Unpaved Roads	
Road Widening	**16,469,280,000**
This involves widening the existing road pavement to accommodate more lanes to ease traffic congestion, improve traffic flow, and increase road capacity. Road widening is essential in high-traffic areas where there is a need to increase the capacity of the national road network.
